## REPORT OF PRINCIPAL AND SCHOOL IMPROVEMENT COUNCIL

Our district mission statement includes several phrases that clearly show what is happening at Blackville-Hilda Junior High School this year. We have "High Expectations" that each student will achieve his or her "Academic Achievement" potential each day. We know that "failure is not an option", and we instill this belief in each student. We provide the necessary support to show that "Knowledge leads to excellence"; therefore, "Success prevails".

We are in our second year of implementation of the Making Middle Grades Work program. By using the information garnered from last year's Technical Assistance Visit, we have implemented a strong improvement program in two of the ten key practice areas that are the focal points for this initiative. Grade level teams met early in the year to establish these goals. The first is literacy improvement. We have begun two specific programs that are designed to support student achievement in this key practice. First, the district has purchased a processing skills program called Fast ForWord that each student has worked on for the entire school year. In addition, we have incorporated a segment of the school day dedicated to silent sustained reading of self-selected texts. Research has shown that both of these interventions have been successful elsewhere, and early test results show remarkable gains here as well.

The other focal point for our improvement plan is to increase rigor in all of our subjects. Several programs have been put into action to accomplish this goal. The Ruth Patrick Center from USC Aiken has been contracted to work with our math teachers on a regular basis to support increasingly rigorous classroom material presentation. Another important element of our effort to provide more rigorous content has been the initial process of learning the Common Core Standards that will be in place in the near future. These are national standards that will bring our students to a higher level of achievement, and our teachers are actively pursuing a number of professional development opportunities to learn these standards and the best practices for putting them into action in the classroom. We have ongoing professional development provided by the Making Middle Grades Work representatives that have addressed how standards are presented in the classroom, specific lesson plans that address key standards, the use of questioning techniques that support more effective critical thinking, and other important positive classroom methodologies.

As we prepare for next year, we will continue to use team effort and data to focus on specific areas of improvement in preparing our students for the academic and life challenges ahead.
